

Your first live poll in 5 minutes

PULS is a tool for interactive presentations: you ask questions, the audience votes via a code on their own phone, and results appear live on the screen. No accounts, no installation — just a browser.

As the host you only need a laptop with a projector; the audience needs a smartphone. You can save this page as a PDF or print it via „**Download PDF**“ in the top right.

1

Create a presentation

On the start page, **joining** takes centre stage (for your audience). Your own entry point sits below under „**Create a new presentation**“: enter a title, click **Create** — you immediately get a private presenter link and a six-digit access code.

- **Secure your access:** the presenter link lives only in your browser. Right after creating, save it via **copy, QR code or email** so you don't lose it.
- Your presentations reappear on the same device under „**My presentations**“.

PULS Live Polling

Guide

Ask questions.
See answers live.

Create interactive slides — multiple choice, word clouds, scales, open questions, and Q&A. The audience votes via code on their own device, results appear in real time.

Start page — joining takes centre stage, „New presentation“ is the calm secondary path.

Build your slides — type gallery & live preview

The editor has three columns: the **slide list** on the left (drag to reorder), the slide in the middle, and a **live phone preview** on the right that follows your typing. „+ New slide" or „Change type" opens the **type gallery** — 9 tiles with an icon and a short explanation:

- **Multiple Choice** · **Word Cloud** · **Open Question** · **Scale**
- **Ranking** · **100 Points** · **Quiz** (with a correct answer)
- **Q&A** (audience questions with 🙌) · **Info slide**

Fine settings are collapsed and expand when you need them. Everything is saved automatically.

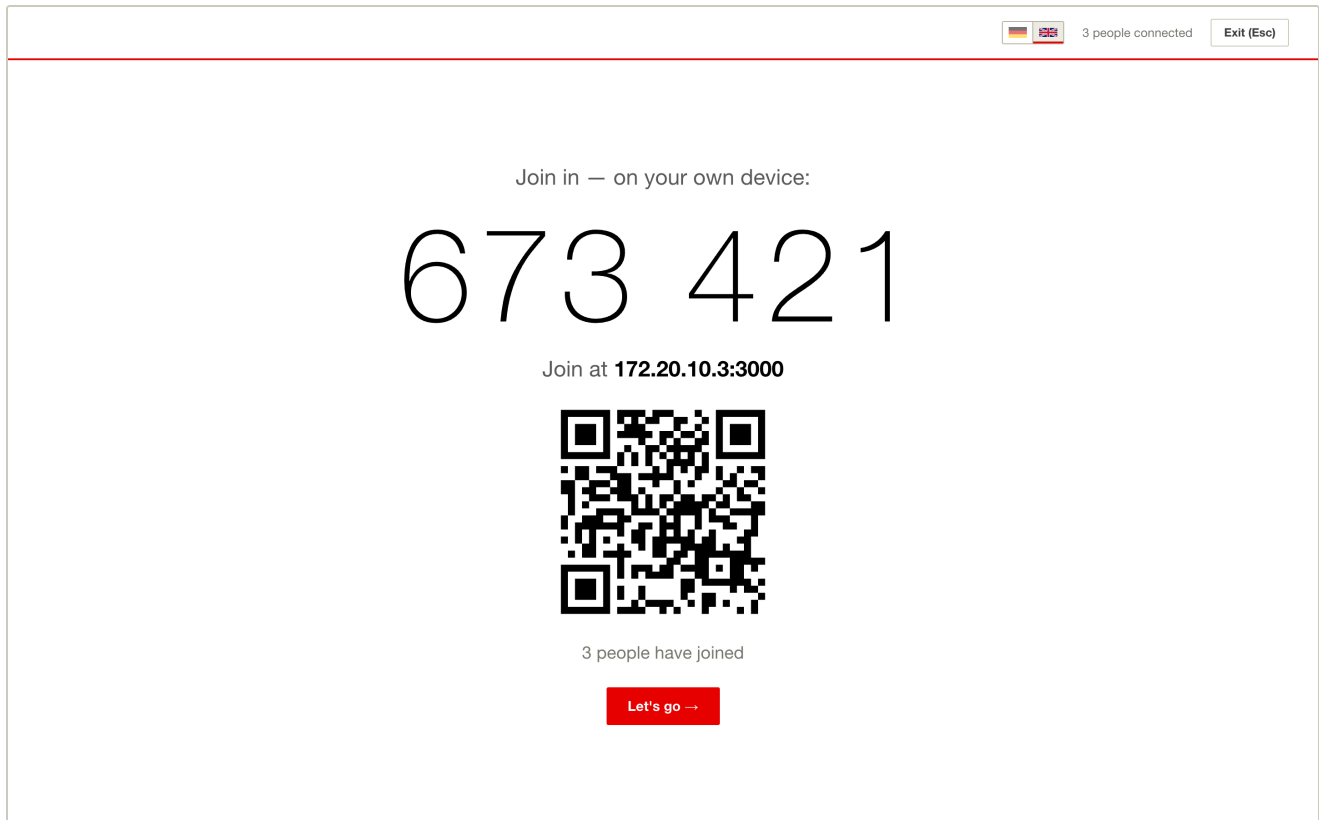

Editor — type gallery with 9 tiles, slide list on the left, live phone preview on the right.

3

Present — the join stage

Click **Present** in the top right. First comes the **join stage**: a large access code, a QR code and a **live counter** of how many people are already in. Once enough have joined, start with „**Let's go**".

- Use ← / → (or the arrow keys) to change slides; keyboard hints are shown.
- Toggle **results** and **voting** with real state switches and status chips.

Presentation mode — join stage with a large code, QR and a live counter.

The audience votes

Participants open the shown address (or scan the QR code) and enter the code. Answering is the same everywhere: a **tap sends immediately** — the options **morph in place** into result bars, with your own choice marked. You can change your answer while voting is open.

- Multi-value types (**100 Points**, **Ranking**, **Open Question**) confirm via a fixed bar at the bottom.
- At the very bottom the audience can also react with **emojis**.

PULS

Code 673 421  

Team meeting July

Slide 1 of 3

How is the team feeling today?

☐ Great 🎉

4 · 25%

☒ Good

7 · 44%

☐ So-so

3 · 19%

☐ Tired

2 · 13%

Phone view after tapping — the options morph in place into result bars, your own choice marked.

5

Quiz with a leaderboard

With the **Quiz** slide type you mark the correct answer. Fast, correct answers earn more points. Only when you click „**Show results**“ does the reveal appear: the correct answer is **highlighted green** and a 🏆 **leaderboard** below shows the frontrunners (enable **name collection** for this).

6

Export your results

All results stay available after the event. From the „...“ **menu** in the top right of the editor you can export them anytime — as **Excel** (raw data per slide for further analysis) or as **PowerPoint** (ready-made result slides for your report). The export uses the current language.

The screenshot shows the PULS Presenter Console interface. On the left, there's an 'Audience access' section with a large number '673 421' and a QR code. Below it is a 'Slides' section with a list of three slides: 'How is the team feeling today?' (Multiple Choice), 'How did last qu...' (Scale), and 'What year was...' (Quiz). The first slide is highlighted with a red box. In the center, the 'Presentation & settings' panel shows the current slide 'Slide 1 of 3' with a 'Multiple Choice' type. The question is 'How is the team feeling today?' and the answer options are 'Great', 'Good', 'So-so', and 'Tired'. At the bottom, the 'Results for this slide' section shows a bar chart with the following data:

Answer	Count	Percentage
Great	4	25%
Good	7	44%
So-so	3	19%

On the right, the 'Live preview' section shows a preview of the slide. A dropdown menu is open in the top right corner, showing options: 'Excel Export', 'PowerPoint Export', 'Reset all answers', and 'Regenerate presenter link'. The 'Present' button is visible in the top right corner.

Editor — the „...“ menu with „Excel Export“ and „PowerPoint Export“.

More features

Branding

Accent colour and your own logo per presentation.

Self-paced

The audience moves through all slides at their own pace.

Reactions

Live emojis (👍 ❤️ 🙌 ...) from the audience.

Collect names

Optional; names appear on Q&A, open answers and the quiz leaderboard.

Q&A moderation

Show questions publicly only after your approval.

Trends across sessions

„Start new session“ archives the results; a history compares several runs.

Anonymous & data-minimal

No accounts, no cookies, no trackers.

Tip: Build your slides calmly in advance. On the day, just open the presenter link, click **Present** and show the code. Results stay available after the event and can be exported.
